4. Question **ONE** is compulsory.
5. Answer any other **FOUR** questions.
6. Question **ONE** carries **30 MARKS** and the rest carry **10 MARKS** each.
7. Write all your answers in the Examination answer booklet provided.

QUESTION ONE

Read the Case Study below carefully and answer the questions that follow:

Effective teams are successful teams. They share common features such as a clear sense of mission, a high level of trust and a result orientation among other characteristics. Due to the difficulties involved in building and coordinating an effective team, a team leader focuses on cultivating team building and conflict management skills even though this is a very daunting undertaking. The good news is that when carefully evaluated and applied, managing teams can be just as effective, rewarding and important for a team's success as any other technical duties. Developing an effective team out of a group of co-workers is always a challenge.

This is because teams are often comprised of members from ~~different~~ functional groups, different geographical regions, and different ethnicities which means a diverse group with different value systems. Therefore, many companies committed to team building, spend time and company resources aiming to build cohesive teams before they assign them duties or projects. Furthermore, companies form teams depending on a number of factors. Where a company is seeking to solve a departmental problem, the company may form a functional team, in case the team members are geographically dispersed, a virtual team will be the most preferred.

As part of their effort to get maximum value and motivation from their employees, more and more organizations enlist creative event planners to organize truly memorable experiences. Such activities challenge the workers mentally and physically, forcing them to work together as teams, and this help in increasing productivity, and in building long lasting camaraderie.

Required:

- a) From the case study, define the term "effective team" (2 marks)
- b) Referring to the case study, one challenge that teams face is groupthink. list five ways of preventing group think in teams (5 marks)
