BCM 411 : MANAGERIAL STATISTICS

DATE: 30TH MARCH 2022

DURATION: 2 HOURS

MAXIMUM MARKS: 70

INSTRUCTIONS:

1. Write your registration number on the answer booklet.
2. **DO NOT** write on this question paper.
3. This paper contains **SIX (6)** questions.
4. Question **ONE** is compulsory.
5. Answer any other **THREE** questions.
6. Question **ONE** carries **25 MARKS** and the rest carry **15 MARKS** each.
7. **Write all your answers in the Examination answer booklet provided.**

Question One

a) From the prices of the shares X and Y given below, state which share is more stable in value and which one would you invest on and why? **(7 marks)**

X:	55	54	52	53	56	58	52	50	51	49
Y:	108	107	105	105	106	107	104	103	104	101

b) A non-governmental organization has offices located in six regions. Given below is data on staffing and running costs in each of the regions

Number of staff	10	8	14	12	11	9
Running cost ('000)	102	93	143	121	118	99

i) Determine the line of best fit using the least squares equation **(6 marks)**

ii) Interpret the meaning of the values of β_0 and β_1 calculated in part (i) above **(2 marks)**

iii) Using the equation in (ii) estimate the cost of running an office with only 5 employees. **(2 marks)**

iv) Compute the coefficient of correlation and coefficient of determination and interpret their values. **(4 marks)**

v) Test the hypothesis that the population correlation coefficient is zero at the 5% level. **(4 marks)**

Question Two

a) State the procedure to a statistical investigation. **(5 marks)**

b) The life times of electric components manufactured by Raman Industries Ltd are normally distributed with mean of 2500 hours and standard deviation of 600 hours. If the daily production is 500 components, how many are expected to have a life time of:

i. Less than 2600 hours **(3 marks)**

ii. Between 2350 hours and 2580 hours **(4 marks)**

iii. More than 2380 hours **(3 marks)**

Question Three

a) List five advantages of calculating median as a measure of central tendency. **(5 marks)**

b) A random sample of 10 light bulbs manufactured by company A had a mean life of 1850 hours and an estimate of the population standard deviation of 130 hours. Also, a random sample of 12 light bulbs manufactured by company B had a mean life of 1940 hours with an estimate of the population standard deviation of 140 hours. Do the data indicate that the true mean life of bulbs manufactured by company B is significantly different from the true mean life of bulbs manufactured by company A? At 5% level of significance. **(10 marks)**

Question Four

The following table indicates the marks obtained by students in a statistics test.

Marks	Number of students
0 – 20	5
20 – 40	7
40 – 60	-
60 – 80	8
80 – 100	7

The arithmetic mean for the class was 52.5 marks. You are required to determine the value of:

i) The missing frequency **(5 marks)**

ii) The standard deviation **(8 marks)**

iii) The coefficient of variation **(2 marks)**

Question Five

Four salesmen were posted in different areas by a company. The number of units sold by them is given below:

A	20	23	28	29
B	25	32	30	21
C	23	28	35	18
D	15	21	19	25

On the basis of this information, can it be concluded that there is a significant difference in the performance of the salesmen? ($\alpha = 0.05$) **(15 marks)**

Question Six

a) Explain the following terms as used in statistics;

i. Population and Sample **(2 marks)**

ii. Qualitative variable and quantitative variable **(2 marks)**

iii. Nominal and Ordinal Scale **(2 marks)**

b) An insurance company claims that it takes 2 weeks (14 days) on average to process an auto accident claim. The standard deviation is 6 days. To test the validity of this claim, an investigator randomly selected 36 people who recently filed claims. This sample revealed that it took the company an average of 16 days to process these claims.

i) At the 1% level of significance, check if it takes the company more than 14 days on an average to process a claim **(6 marks)**

ii) Construct a 99% confidence interval for the average number of days taken to process a claim. **(3 marks)**
